Summary & Background

(First sentence includes Department recommendation. Provide an executive summary of the action that gives an overview of the relevant details for the item.)

Ordinance 98-170 has been revised to provide updated concentration limits of pollutants discharged by industrial users that may affect RWR's cost of wastewater treatment and permit limits.

The surcharge will recover the portion of costs associated with treating high strength discharge to normal levels in order to maintain compliance at each wastewater facility. The surcharge covers additional O&M costs required to treat the heavy concentrations.

The surcharge rates are also being adjusted at this time and will be presented within the RWR Rate Resolution. These rates have not been adjusted in 17 years and are not recovering current operating costs.
